Acknowledgements and Release History

From SEBoK
Acknowledgements and Release History

SEBoK Original Work. Video was created by Rob Cloutier (2019 SEBoK Editor in Chief).

This article describes the contributors to the current version of the SEBoK. For information on contributors to past versions of the SEBoK, please follow the links under “SEBoK Release History” below. To learn more about the updates to the SEBoK for v. 2.1, please see the Letter from the Editor.

The BKCASE Project began in the fall of 2009. Its aim was to add to the professional practice of systems engineering by creating two closely related products:

- Guide to the Systems Engineering Body of Knowledge (SEBoK)
- Graduate Reference Curriculum for Systems Engineering (GRCSE)

Contents

- 1 BKCASE History, Motivation, and Value
- 2 Governance
- 3 Content and Feature Updates for 2.1

BKCASE History, Motivation, and Value

The Guide to the Systems Engineering Body of Knowledge (SEBoK) is a living authoritative guide that discusses knowledge relevant to Systems Engineering. It defines how that knowledge should be structured to facilitate understanding, and what reference sources are the most important to the discipline. The curriculum guidance in the Graduate Reference Curriculum for Systems Engineering (GRCSE) (Pyster and Olwell et al. 2015) makes reference to sections of the SEBoK to define its core knowledge; it also suggests broader program outcomes and objectives which reflect aspects of the professional practice of systems engineering as discussed across the SEBoK.

Between 2009 and 2012 BKCASE was led by Stevens Institute of Technology and the Naval Postgraduate School in coordination with several professional societies and sponsored by the U.S. Department of Defense (DoD), which provided generous funding. More than 75 authors and many other reviewers and supporters from dozens of companies, universities, and professional societies across 10 countries contributed many thousands of hours writing the SEBoK articles; their organizations provided significant other contributions in-kind.

The SEBoK came into being through recognition that the systems engineering discipline could
benefit greatly by having a living authoritative guide closely related to those groups developing
guidance on advancing the practice, education, research, work force development, professional
certification, standards, etc.

At the beginning of 2013, BKCASE transitioned to a new governance model with shared stewardship
between the Systems Engineering Research Center (SERC), the International Council on Systems
Engineering (INCOSE), and the Institute of Electrical and Electronics Engineers Computer Society
(IEEE-CS). This governance structure was formalized in a memorandum of understanding between
the three stewards that was finalized in spring of 2013. The stewards have reconfirmed their
commitment to making the SEBoK available at no cost to all users, a key principle of BKCASE.

As of the end of July 2019, SEBoK articles have had over 3.4M pageviews from 1.7M unique visits.
We hope the SEBoK will regularly be used by thousands of systems engineers and others around the
world as they undertake technical activities such as eliciting requirements, creating systems
architectures, or analysis system test results; and professional development activities such as
developing career paths for systems engineers, deciding new curricula for systems engineering
university programs, etc.

Governance

The SEBoK is shaped by the BKCASE Editorial Board and is overseen by the BKCASE Governing
Board. A complete list of members for each of these bodies can be found on the BKCASE Governance
and Editorial Board page.

Content and Feature Updates for 2.1

This version of the SEBoK was released 31 October 2019. This is a significant release of the SEBoK
which includes new articles, new functionality and minor updates throughout. The SEBoK PDF was
also updated (see Download SEBoK PDF).

For more information about this release please refer to Development of SEBoK v. 2.1.

SEBoK Release History

There have been 21 releases of the SEBoK to date, collected into 13 main releases.

Main Releases

- Version 2.1 - Current version. This is a significant release with new articles, new functionality, and
  minor updates throughout.
- Version 2.0 - This was a major release of the SEBoK which included incorporation of multi-media
  and a number of changes to the functions of the SEBoK.
- Version 1.9.1 - This was a micro release of the SEBoK which included updates to the editorial
  board, and a number of updates to the wiki software.
- Version 1.9 - A minor update which included updates to the System Resilience article in Part 6:
  Related Disciplines, as well as a major restructuring of Part 7: Systems Engineering
  Implementation Examples. A new example has been added around the use of model based systems
  engineering for the thirty-meter telescope.
- Version 1.8 - A minor update, including an update of the Systems of Systems (SoS) knowledge area
  in Part 4: Applications of Systems Engineering where a number of articles were updated on the
  basis of developments in the area as well as on comments from the SoS and SE community. Part 6:
  Related Disciplines included updates to the Manufacturability and Producibility and Reliability,
  Availability, and Maintainability articles.
- Version 1.7 - A minor update, including a new Healthcare SE Knowledge Area (KA), expansion of
the MBSE area with two new articles, Technical Leadership and Reliability, Availability, and Maintainability and a new case study on the Northwest Hydro System.

- Version 1.6 - A minor update, including a reorganization of Part 1 SEBoK Introduction, a new article on the Transition towards Model Based Systems Engineering and a new article giving an overview of Healthcare Systems Engineering, a restructure of the Systems Engineering and Specialty Engineering KA.
- Version 1.5 - A minor update, including a restructure and extension of the Software Engineering Knowledge Area, two new case studies, and a number of corrections of typographical errors and updates of outdated references throughout the SEBoK.
- Version 1.4 - A minor update, including changes related to ISO/IEC/IEEE 15288:2015 standard, three new case studies and updates to a number of articles.
- Version 1.3 - A minor update, including three new case studies, a new use case, updates to several existing articles, and updates to references.
- Version 1.2 - A minor update, including two new articles and revision of several existing articles.
- Version 1.1 - A minor update that made modest content improvements.
- Version 1.0 - The first version intended for broad use.

Click on the links above to read more information about each release.

**Wiki Team**

In January 2011, the authors agreed to move from a document-based SEBoK to a wiki-based SEBoK, and beginning with v. 0.5, the SEBoK has been available at www.sebokwiki.org Making the transition to a wiki provided three benefits:

1. easy worldwide access to the SEBoK;
2. more methods for search and navigation; and
3. a forum for community feedback alongside content that remains stable between versions.

The Managing Editor is responsible for maintenance of the wiki infrastructure as well as technical review of all materials prior to publication. Contact the managing editor at emtnicole@gmail.com

The wiki is currently supported by Ike Hecht from WikiWorks.
