Architecting (glossary)

From SEBoK

architecting

(1) Process of conceiving, defining, expressing, documenting, communicating, certifying proper implementation of, maintaining and improving an architecture throughout a system’s life cycle (ISO/IEC/IEEE 2011)

(2) The architecting process sometime involves the use of heuristics to establish the form of architectural options before quantitative analyses can be applied. Heuristics are design principles learned from experience. (Rechtin 1990)
