Concurrently (glossary)

From SEBoK
concurrently

(1) *Two or more activities occurring within the same interval of time, achieved either by interleaving the activities or by simultaneous execution.* (ISO/IEC/IEEE 2010)

(2) *A problem, process, system, or application in which many activities are happening in parallel, the order of incoming events is not usually predictable, and events often overlap.* (ISO/IEC/IEEE 2010)

Sources

Discussion

Modified from the definition of ‘concurrent’.

**SEBoK v. 2.1, released 31 October 2019**
