ISO/IEC/IEEE 15288

From SEBoK
ISO/IEC/IEEE 15288

Usage

This source is considered a primary reference for the following articles:

- Analysis and Selection between Alternative Solutions
- Synthesizing Possible Solutions
- Systems Engineering and Management
- System Life Cycle Process Models: Vee
- System Definition
- Business or Mission Analysis
- System Requirements
- Logical Architecture Model Development
- System Realization
- System Implementation
- System Verification
- System Deployment
- Operation of the System
- System Maintenance
- Planning
- Configuration Management
- Information Management
- Relevant Standards
- Integration of Process and Product Models
- Logical Architecture Model Development
- System Validation
- Stakeholder Needs and Requirements
- Concept Definition
- Applications of Systems Engineering

Annotation

To view the abstract for this standard, see the ISO website.

SEBoK v. 2.2, released 15 May 2020
