Mission (glossary)

From SEBoK
mission

*The mission of a system is the top-level function of the system; the one that synthesizes all transformation of all inputs and solicitations into outputs and reactions.* (Created for SEBoK)

**Source**

This definition was developed for the SEBoK.

**Discussion**

For a full discussion of the role and importance of a clear understanding of mission needs in systems engineering see the Business or Mission Analysis article.
