Model-Oriented Systems Engineering Science

From SEBoK
Model-Oriented Systems Engineering Science

Usage

This source is considered a primary reference for the following articles:

- Service Systems Engineering Stages
- Principles of Systems Thinking
- Patterns of Systems Thinking

Annotation

This text presents methodologies that utilize systems science (SS) to support the transition, identifying and using commonalities between complex systems and other sciences, such as biology, sociology, cognitive science, etc. The text introduces the model-oriented systems engineering science (MOSES) concept as an organized system that selects appropriate information from multiple disciplines and unifies it into a coherent framework resulting in a seamless approach to develop an enhanced and unified SE.
