The goal of project management is to plan and coordinate the work activities needed to deliver a satisfactory product, service, or enterprise endeavor within the constraints of schedule, budget, resources, infrastructure, and available staffing and technology. The purpose of this knowledge area (KA) is to acquaint systems engineers with the elements of project management and to explain the relationships between systems engineering (SE) and project management (PM).

### Topics

Each part of the SEBoK is divided into knowledge areas (KAs), which are groupings of information with a related theme. The KAs, in turn, are divided into topics. This KA contains the following topics:
The Nature of Project Management

An Overview of the PMBOK® Guide

Relationships between Systems Engineering and Project Management

The Influence of Project Structure and Governance on Systems Engineering and Project Management Relationships

Procurement and Acquisition

Portfolio Management
