Content and Feature Updates for v. 1.7

This section provides a summary of changes for SEBoK v1.7. See letter from the editor for a wider discussion of the changes and future plans.

This is a minor update, that features a new Healthcare SE Knowledge Area (KA) in Part 4: Applications of Systems Engineering introducing four new articles on healthcare, Overview of the Healthcare Sector, Systems Engineering in Healthcare Delivery, Systems Biology, Lean in Healthcare.

The focus on MBSE has also been expanded with two new articles, an MBSE case study added to Part 7 and an article describing the use of SysML for modelling Systems Engineering Core Concepts. Part 7 has been expanded with an additional case study on

the Northwest Hydro System. The article on Technical Leadership in Part 5 has been updated with new material, and Part 6 has also seen major updates of the Reliability, Availability, and Maintainability article as well as the System Resilience (formerly "Resilience Engineering") article.

Finally, work has been done on describing the organization of knowledge within the SEBoK with the aim of providing readers with better guidance through the SEBoK structure. The Structure of the SEBoK has been update to provide a better overview of the SEBoK and a simplified version of the central model created for the SEBoK structure has been added to the SEBoK main page and to the introductions of each individual part of the SEBoK.
