Content and Feature Updates for v. 1.9

This section provides a summary of changes for SEBoK v. 1.9. See letter from the editor for a wider discussion of the changes and future plans.

This is a minor release of the SEBoK which includes updates to the System Resilience (formerly "Resilience Engineering") article in Part 6: Related Disciplines, as well as a major restructuring of Part 7: Systems Engineering Implementation Examples. This restructuring removed the old framework for examples ("vignettes" and "case studies", which reflected how the examples were developed). The examples have been organized based on the organizational context: examples from commercial organizations, government organization, or examples in which development was a partnership between the two. In addition, a new example has been added around the use of model based systems engineering for the thirty-meter telescope.
