The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

A set of test inputs, execution conditions, and expected results developed for a particular objective, such as to exercise a particular program path or to verify compliance with a specific requirement. (IEEE 2004)

Sources

IEEE. 2004. *IEEE Standard for Software Verification and Validation*. Washington, DC, USA: Institute of Electrical and Electronics Engineers (IEEE). IEEE 1012-2004.

Discussion

None.

SEBoK v. 2.4, released 19 May 2021
